10th October 2011

To Whom it may concern,

RE: Prestige Golfshire, Bangalore

We carried out a search for lake liners for the above project and after much consideration we selected DBS Building Products to supply and fix Firestone EPDM.

It was especially important to us that the lakes suffered no leaks since we were reliant on water harvesting during monsoon to provide year round irrigation.

DBS Building Products attended site on programme, stored the material properly and completed the installation with no problems or issues. Out of all the lakes we have lined, I have never had such a good service with perfect results and will definitely use DBS Building Products again for any lakes we build in India.

Yours faithfully

R A Hunt
Chairman
